

# Surviving the Applewhites

## Animal Display Board

Your display board must have the following information:

1. A title/topper
2. A 5 paragraph paper that includes many interesting facts about your animal. It must have an introductory and concluding paragraph as part of the 5. A bibliography must be included as well using EZbib.com.
3. A graph (bar, line, or circle) that depicts important information about your topic. Use <http://nces.ed.gov/nceskids/index.asp> to build graph.
4. A depiction of your animals lifecycle. This graphic should guide the reader through the life process.
5. A three dimensional object(s) to sit in front of your board that represents something about your topic.
6. Some form of technology must be used in your presentation/board.
7. The rest of the board can be creatively embellished with anything else you find interesting. These are your opportunities to go above and beyond.
